**Subject:** Re an outreach flyer for the March 15 meeting

David:

ICC's outreach workers are planning to distribute a flyer this week about the March 15 EPA community meeting, with a special focus on the households closest to the clean-up site. We really need to do the outreach now if we want to have a good attendance. The Principal of the school is also prepared to send a flyer home with the kids.

I have not received a flyer from you, and I don't know if you already have one in the works. I can make a flyer today and send it to the printer for tomorrow. I don't know how this type of expense fits into your budget for the meeting or how you want to handle this. The bottom line is we really need to act fast to get the word out. People here do not use e-mail very much, so we can't do much outreach that way.

Hope to hear from you soon.

Cynthia
